

Easy mounting photoelectric sensor in short M18 housing

E3FZ/E3FR

- Secure-click snap mounting for fast installation
- High power LED for enhanced sensing distance
- Short housing with less than 40 mm length
- Minimal optical axis deviation for easy alignment

Features

Easy and fast installation

The **SecureClick** snap mounting mechanism provides easy installation in 2 steps and enhanced protection against vibration.

Installation time can be reduced by up to 10 times compared to conventional sensors.

*SecureClick has been tested to withstand severe vibrations.

Ordering Information

Snap mounting – E3FZ^{*2}

Sensor type	Sensing distance	Connection method				Order code

7. Emitter/ Receiver
 - L: emitter
 - D: receiver
8. Kind of connection
 - Blank: standard 2 m cable or M12 connector
 - M1J: pre-wired with 30 cm cable and M12 plug connector (4 pin)
 - M3J: pre-wired with 30 cm cable and M8 plug connector (4 pin)
 - M5J: pre-wired with 30 cm cable and M8 plug connector (3 pin)
 - M1TJ: pre-wired with 30cm cable and Twist&Click M12 plug connector (4 pin)
9. Cable length
 - Blank: M12 connector
 - Number: cable length

Mounting and dismounting

Mounting

Step 1

Insert the snap holder into the mounting hole from the front

Verify the correct position (a clicking sound can be heard)

Step 2

Insert the sensor into the snap holder from the back

Verify the correct position (a clicking sound can be heard)

Dismounting

Step 1

Apply soft pressure to the sensor lens in the indicated areas (e.g. with two thumbs)

Remove the sensor

Step 2

Press down both snap-fits and push the snap holder forward.

Remove the snap holder

Specifications

Item	Through-beam		Retroreflective	Diffuse reflective
	E3FZ-T / E3FR-T		E3FZ-R / E3FR-R	E3FZ-D / E3FR-D
Sensing distance	15 m		4 m [100 mm]	1 m (white paper 300x300 mm)
Spot diameter	-			
Standard sensing object	Opaque: 12 mm dia. min		Opaque: 75 mm dia. min	-
Differential travel	-			20% max. of sensing distance max.
Black/white error	-			
Directional angle	Emitter and Receiver: 3° to 15°		Sensor: 3° to 10°, Reflector: 30°	-
Light source (wave length)	Infrared LED (870 nm)		Red LED (660 nm)	Infrared LED (860 nm)
Power supply voltage	10 to 30 VDC, including 10% ripple(p-p)			
Current consumption	45mA max. (Emitter: 25mA max., Receiver; 20 mA max.)		25 mA max.	
Control output	Load power supply voltage; 30 VDC max., Load current; 100 mA max.(Residual voltage; 2 V max.), Light-on/Dark-on selectable by wire, E3F□-6□: NPN open-collector output E3F□-8□: PNP open-collector output			
Protective circuits	Power supply reverse polarity protection, output short-circuit protection, and reversed output polarity protection		Power supply reverse polarity protection, output short-circuit protection, mutual interference prevention and reversed output polarity protection	
Response time	Operate and reset; 1 ms max.			
Sensitivity adjustment	-			One-turn adjuster
Ambient illumination (receiver side)	Incandescent lamp; 3000 lx max., Sunlight 10000 lx max.			
Ambient temperature	Operating; -25 to +55°C, Storage; -40 to +70°C (with no icing or condensation)			
Ambient humidity	Operating; 35 to 85% RH, Storage; 35 to 95% RH (with no condensation)			
Insulation resistance	20MΩ min. at 500 VDC			
Dielectric resistance	1000 VAC at 50/60 Hz for 1 min			
Vibration resistance	Destruction; 10 to 55 Hz, 1.5 mm double amplitude for 2 hours, each in X, Y and Z directions			
Shock resistance	Destruction; 500 m/s ² , 3 times, each in X, Y and Z directions			
Degree of protection *1	IEC 60529 IP67, IP69K after DIN 40050-9			
Connection method	Pre-wired cable (standard length 2 m), Standard M12 connector			
Indicator	Operation indicator: yellow, stability indicator: green (Emitter has only power supply indicator; green)			
Weight (packed state)	Pre-wired	approx. 120 g	approx. 60 g	
	Standard connector	approx. 40 g	approx. 20 g	
Material	Case	ABS		
	Cover lens	PMMA		
	Plate window			
Accessories	Instruction sheet, 2x M18 nuts, snap mounting tool (E3FZ only).			

*1. The IP69k test according to DIN 40 050 part 9 is intended to simulate high pressure/steam cleaning. During the test 14-16 l/min water at 80°C is sprayed onto the sensor from different angles with 8000-10000 kPa. The sensor may not suffer any damaging effects from high pressure water in appearance and functionality.

Specification

Item	Background suppression (BGS)

Safety precautions

 **Warning**

This product is not designed or rated for directly or indirectly ensuring safety of persons. Do not use it for such a purpose. 

 **Caution**

Do not use the product with voltage in excess of the rated voltage. Excess voltage may result in malfunction or fire. 

Never use the product with an AC power supply. Otherwise, explosion may result. 

When cleaning the product, do not apply a high-pressure spray of water to one part of the product. Otherwise, parts may become damaged and the degree of protection may be degraded. 

High-temperature environments may result in burn injury. 

Precautions for Safe Use

The following precautions must be observed to ensure safe operation of the Sensor.

Operating Environment

Do not use the Sensor in an environment where explosive or flammable gas is present.

Connecting Connectors

Be sure to hold the connector cover when inserting or removing the connector. Be sure to tighten the connector lock by hand; do not use pliers or other tools. If the tightening is insufficient, the degree of protection will not be maintained and the Sensor may become loose due to vibration. The appropriate tightening torque is 0.39 to 0.49 N·m for M12 connectors.

Load

Do not use a load that exceeds the rated load.

Rotation Torque for Sensitivity Adjustment

Adjust with a torque of 0.05 N·m or less.

Environments with Cleaners and Disinfectants (e.g., Food Processing Lines)

Do not use the Sensor in environments subject to cleaners and disinfectants. They may reduce the degree of protection.

Modifications

Do not attempt to disassemble, repair, or modify the Sensor.

Outdoor Use

Do not use the Sensor in locations subject to direct sunlight.

Cleaning

Do not use thinner, alcohol, or other organic solvents. Otherwise, the optical properties and degree of protection may be degraded.

Surface Temperature

Burn injury may occur. The Sensor surface temperature rises depending on application conditions, such as the surrounding temperature and the power supply voltage. Use caution when operating or washing the Sensor.

Precautions for Correct Use

Do not use the Sensor in any atmosphere or environment that exceeds the ratings.

Do not install the Sensor in the following locations.

- (1) Locations subject to direct sunlight
- (2) Locations subject to condensation due to high humidity
- (3) Locations subject to corrosive gas
- (4) Locations where the Sensor may receive direct vibration or shock

Connecting and Mounting

- (1) The maximum power supply voltage is 30 VDC. Before turning the power ON, make sure that the power supply voltage does not exceed the maximum voltage.
- (2) Laying Sensor wiring in the same conduit or duct as high-voltage wires or power lines may result in malfunction or damage due to induction. As a general rule, wire the Sensor in a separate conduit or use shielded cable.
- (3) Use an extension cable with a minimum thickness of 0.3 mm² and less than 100 m long.
- (4) Do not pull on the cable with excessive force.
- (5) Pounding the Photoelectric Sensor with a hammer or other tool during mounting will impair water resistance.
- (6) Mount the Sensor either using the bracket (sold separately) or on a flat surface.
- (7) Be sure to turn OFF the power supply before inserting or removing the connector.

Cleaning

Never use thinner or other solvents. Otherwise, the Sensor surface may be dissolved.

Power Supply

If a commercial switching regulator is used, ground the FG (frame ground) terminal.

Power Supply Reset Time

The Sensor will be able to detect objects 100 ms after the power supply is tuned ON. Start using the Sensor 100 ms or more after turning ON the power supply. If the load and the Sensor are connected to separate power supplies, be sure to turn ON the Sensor first.

Turning OFF the Power Supply

Output pulses may be generated even when the power supply is OFF. Therefore, it is recommended to first turn OFF the power supply for the load or the load line.

Load Short-circuit Protection

This Sensor is equipped with load short-circuit protection, but be sure to not short circuit the load. Be sure to not use an output current flow that exceeds the rated current. If a load short circuit occurs, the output will turn OFF, so check the wiring before turning ON the power supply again. The short-circuit protection circuit will be reset. The load short-circuit protection will operate when the current flow reaches 1.8 times the rated load current. When using a capacitive load, use an inrush current of 1.8 times the rated load current or higher.

Water Resistance

Do not use the Sensor in water, rainfall, or outdoors.

WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

SUITABILITY FOR USE

THE PRODUCTS CONTAINED IN THIS DOCUMENT ARE NOT SAFETY RATED. THEY ARE NOT DESIGNED OR RATED FOR ENSURING SAFETY OF PERSONS, AND SHOULD NOT BE RELIED UPON AS A SAFETY COMPONENT OR PROTECTIVE DEVICE FOR SUCH PURPOSES. Please refer to separate catalogs for OMRON's safety rated products.

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the product.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this document.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

PERFORMANCE DATA

Performance data given in this document is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the product may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products.

DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

ERRORS AND OMISSIONS

The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.

PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

Cat. No. E55E-EN-01

In the interest of product improvement, specifications are subject to change without notice.
