Mirror for Safety Light Curtain F3S and Safety Single Beam E3FS

F39-MDG

INSTRUCTION MANUAL

In case of damaged products please contact the manufacturer please indicate the detected failure and the operational period.

Date 16/11/01

APPLICATION:

This mirror series was created to meet any protection needs were it is necessary to realise achieve surrounding protection.

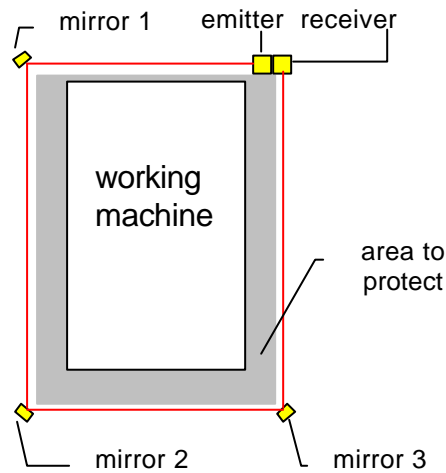

Thanks to easy installation and excellent performances, this product is extremely versatile and suits the most varied applications.

It is possible to use these mirrors with the F3S-A, F3S-B, F3SN safety light curtain and E3FS photoelectric switches series.

Typically it is used to protect an area with only one light curtain as shown in figure below.

Please make sure the person operating the Safety Light Curtain, mirror and other accessories is knowledgeable about the machine on which it is installed.

A qualified person, as determined by local regulations, must confirm that installation, inspection and maintenance are implemented correctly. Read the instruction manual of the Safety Sensor carefully prior installation.

TECHNICAL DETAILS:

- Iron painted case RAL1024
- Reduction of detection distance for each mirror: ~ 8-15%
- 2 x M8 mounting brackets
- Easy installation.

MAINTENANCE:

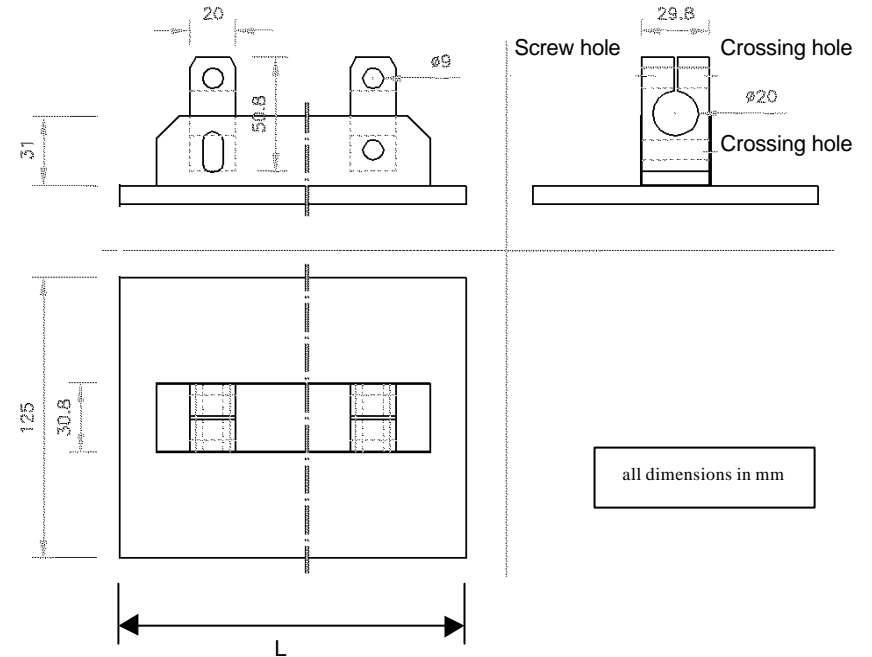

For cleaning please wet the mirror surface using appropriate cleansing.

Do not use solvent to clean the mirror or its housing.

The interval of cleaning depends on the particular application and conditions in which the safety light curtain is installed.

Please check the instruction manual for safety light curtain in addition.
